

**Fast, efficient, and affordable  
concrete solutions.**

## **SD7 Joint-Savers**

STS Concrete Solutions is a certified installer for the SD Joint-Savers. The patented SD is a fast, cost-efficient fix for joints and cracks that are loose, rocking or separated. Once the device is installed, floor deflection is eliminated leaving a smooth, positive load transfer.

Our perfected installation techniques will allow your facility very little downtime. Building owners see an immediate increase in productivity and operating efficiency, while lowering vehicle and floor maintenance and risk management costs.

### **How it works**

Loose joints lose the ability to transfer vertical loads. As a vehicle approaches a joint, the near side of the joint will deflect while the far side deflects less or not at all. The difference in movement is the main cause of damage to tires and joint deterioration.

Once the joint saver is installed, the integrity of the joint is re-established resulting in a smooth, stabilized joint. This product has been proven in extreme cold temperatures and has the ability to withstand large temperature adjustments.

## **Epoxy Floor Coating**

Another great advantage of working with STS Concrete Solutions is our top of the line epoxy floor coating. There is no better way to complete a concrete floor with the color and finish of your choice. We use Tennant Floor Coatings, a trusted company for over 135 years and considered by most as the leader in flooring experience and expertise. Tennant provides durable, high-performance concrete coatings that, together with STS Concrete Solutions make floors easier to clean and maximize the longevity of the floor. Epoxy floor coatings are great for garages, schools, stores, warehouses, restrooms, basements and can even repair pitted or cracked floors.

### **Make an impact on your facility's image**

Epoxy floor coating will create a great first impression with customers, visitors, partners, and prospective clients.

### **Easy to maintain floors**

Our coatings will protect your floor from dust, dirt, chemicals, and most importantly traffic. They are easy to clean and maintain.

### **Wide range of choices**

We offer a variety of coatings that fit your need and provide you with the colors of your choice.

### **Save Money**

A great way to save money by reducing maintenance costs and traction to floors, and increasing safety and light reflectivity.
